,255 junior 5.1.2 2,837 junior 5.2.1 182 junior 6.3.3 5,873 junior 6.3.2 160 So, for instance, 5.1.1 has a ratio of \$5,873/211,255\$ of the user's balance. Basically, I want to find out how much of the user's balance is in this account. I am expecting it to be \$21,874.79\$ as that is roughly the ratio between the two accounts. As can be seen, I am unable to find a way to do this. I have tried the following code, but it doesn't give the expected results. data have; input user_id account balance; datalines; id 5.1.1 211,255 id 5.1.2 182 id 5.2.1 20 id 5.2.2 987 id 6.3.3 5,873 id 6.3.2 160 ;;; run; proc sql; create table final as select user_id, "user's balance" as balance from have where id = 1; quit; A: Use the min() and max() functions to determine the ratio of the two accounts. Q: Execute a method using linkButton in asp.net I'm trying to create a linkButton that changes the background color of an html 82157476af
